

BANKOSA BK150F Banknote Sorter

A banknote sorter **BK150F** is designed to sort and recount cash efficiently. This device detects counterfeit banknotes precisely and supports various operating modes. The device provides high-speed recounting, reaching up to 900 banknotes per minute. The serial number reading feature simplifies counting, sorting, authentication, and other accounting processes that require accuracy and reliability.

FEATURES

Flexible Counting Features

Includes multi-counting modes: mix-counting, sorting, counting, auto currency and mix currency counting, serial number reading, etc.

Colorful Screen

5-inch big colorful TFT screen with smart touch function and user-friendly interface, easy to use.

Protects Against Counterfeits

Defends against counterfeit bills with Ultraviolet, Magnetic, and Infrared Detection technology. Secured counterfeit detection by dual CIS sensors.

Easy Maintenance

With the special front side & back side open design, you can do the machine cleaning and maintenance very easily.
