FEATURES

Versatility

The device can process coins of any currency and denomination that meet the size range of 14 to 33 mm in diameter and 1 to 4 mm in thickness.

Bright LED Display

A clear, 6-digit display with bright red symbols.

Variety of Functions

The BANKOSA BK-1700 offers key functions, including simple counting mode (CNT), accumulation mode (ADD), and batch counting mode for pre-set coin quantities (Batch).

Large Hopper Capacity

The standard hopper capacity is 3,000 coins, with the option to expand it to 9,000 coins, reducing the need for frequent loading.

High Processing Speed

The device processes up to 2300 coins per minute, significantly saving time on counting.

Reliability

All mechanisms are easily accessible for cleaning and removing jams without needing to remove or empty the hopper.
