ADVANTAGES

Ease of use

Large and bright 4.3" color touchscreen display along with an informative and intuitive menu makes it easy to set up and operate the counter.

Extensive detection capabilities

Recognition of currencies, denominations, serial numbers, orientation, as well as the detection of counterfeit banknotes is carried out by a modern detection module, equipped with a double-sided CIS-sensor, magnetic, infrared, ultraviolet sensors that read machine-readable marks on banknotes.

Performance

The sorter offers a high speed of simple counting 1200 banknotes per minute, and sorting in the modes of reading the image of the banknote and serial number 1000 banknotes per minute.

Integrated printer

The counter accurately recognizes the denominations and serial numbers of the calculated banknotes, and the built-in thermal printer allows you to immediately print out the results of cash processing.

Fast sorting

The high-performance processor is able to quickly compare scanned banknotes against a library of programmed images of 15 currencies to maintain sorting speeds of up to 1,000 new banknotes per minute by currency, denomination, issue series and orientation.

SPECIFICATIONS

Detection types	2CIS, UV, MG, MT, IR
Display	4,3" colored sensor
Pockets	1 + 1
Hopper Capacity, banknotes	350
Stacker Capacity, banknotes	200
Reject Capacity, banknotes	50 (up to 100)
