

SOUTH-Wrap

Professional Coin Wrapper

SOUTH-Wrap by **South Automation** is a professional solution for industrial coin and token processing lines, designed to wrap coins into paper rolls with maximum efficiency and precision.

The wrapper can be integrated into both fully automated and semi-automated coin processing systems and is an essential component for central cash centers, bank head offices, mints, cash-in-transit companies, and businesses in the entertainment industry.

ADVANTAGES

Performance

Unlike entry-level wrappers that rely on preformed tubes, SOUTH-Wrap creates uniform coin stacks and securely wraps them into neat paper rolls at speeds of up to 30 rolls per minute.

Versatility

The machine supports a wide range of coin and token diameters and thicknesses. It includes outputs for elevator connection and conveyor system integration.

Reliability

Its robust construction, combined with wear-resistant components made of specialized alloys and ceramics, ensures long-term durability and minimal maintenance requirements.

User-Friendly Operation

The machine is operated via a control panel with tactile buttons and a monochrome LCD display. The intuitive interface allows for precise adjustment of wrapping parameters and quick access to settings.

Optional Counterfeit Detection

SOUTH-Wrap can be integrated into any coin processing line configuration and optionally equipped with the CashDNA™ detection module for false coin verification. This module analyzes metal composition and physical characteristics to detect counterfeits. CashDNA™ complies with EU Regulation No. 1210/2010 and is tested and approved for use within the European Union.

SPECIFICATIONS

Display	Monochrome TFT
Hopped capacity	10 000
Counterfeit recognition	Optional
S/N Recognition	Optional
Dust Remove	Yes
Packaging Speed, rolls per minute	30
Automated Feeding	Yes
Options	Coin elevator/ Packing line integration
Ports	RS232/ lift control/ power out/ packing line
Power consumption	AC 100-240V 50/60Hz 340W
Weight, kg	140
Dimensions (W x H x D)	455 X 585 X 1160
Package Weight, kg	191
Package Dimensions (W x H x D)	880 x 570 x 1540
Manufactured in	Germany

South Automation has been working in the cash handling industry for over 25 years, offering a wide range of solutions for coin identification, sorting, and packaging. Thanks to its functional models, in-house innovations, modern manufacturing, and excellent service, 4 out of 4 CIT companies choose **South Automation** products.

ABOUT BS/2

For over 30 years, **BS/2** has delivered specialized software and technological solutions for banks, financial institutions, and retail businesses, focusing on developing self-service channels. It offers a wide range of cash counting and sorting equipment for commercial and central banks, cash-in-transit companies, and retail locations. **BS/2** is part of the **Penki Kontinentai** group.
